

Should you contribute more to your retirement plan?

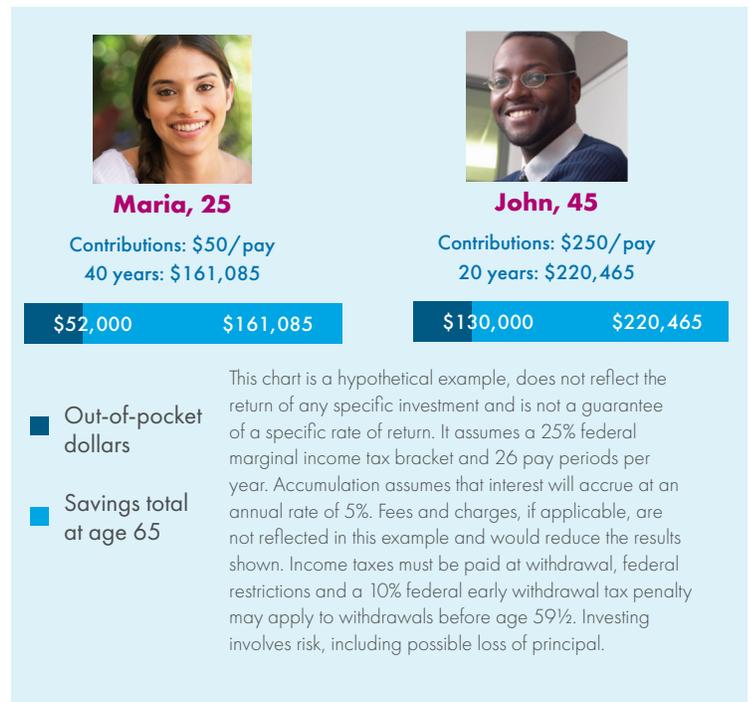

You've been saving. But do you know if it's enough?

Starting early and saving enough can make all the difference in reaching your financial goals. In this hypothetical example, by starting at age 25, Maria contributes just \$50 per paycheck, and accumulates more than \$160,000 by age 65. But John, waiting till age 45, must contribute \$250 per paycheck to hit his retirement goal.

Are you on track for the future you envision? **I can help.**
